KamaGames Studio

Moscow, kamagames.com/

Senior Frontend Developer

I had full responsibility for internal report and data visualization service.
I gathered requirements from internal consumers, develop frontend (Angular 1), backend (Node.js), integrate third party services.
I coordinated data gathering from all company departments.
I interviewed the frontend developers and fullstack developers.

Developed service features, fix bugs, create UI.
Developed API on Node.js.
Unit tests (Mocha + Chai). Added
OAuth with LDAP.

A little maintance internal ReactJS project: creating new components, bugfixing (a lot).

Tools: WebStorm, Git, Redmine, Postman.

Stack: JavaScript, SCSS, HTML, Angular.js, React.js, Lodash, Node.js, Mocha, Chai, Websockets, a little MySQL and Redis.

Further information

About me Looking for Paris (France) or remote positions only.

I want to make web a little bit better: more comfortable for users and much comprehensible for crawlers.

Flexible shedule is preferable.

I am diligent, meticulous and scrupulous person.
I am very glad to see good solutions and try to no let bad solutions to go to the production.

I have perfect Russian and upper intermediate English.

I can make cross-browser layout (possible IE6+, preferable IE11+).

In the workplace I need to have two displays
